

My Local Environment

This short learning activity helps students understand what the local environment is, what problems can appear there, and how people can help protect it.

Problems

People

Solutions

What is my local environment?

My local environment includes places around me such as parks, rivers, streets, forests, fields, and buildings where people live, work, and relax.

Common environmental problems

In many local areas, people can see problems such as littering, air pollution, noise, lack of green spaces, or polluted water.

How do people affect the environment?

Human activities like transport, waste production, and consumption have a strong impact on the quality of the environment and people's quality of life.

What can we do?

People can help by reducing waste, recycling, saving energy, using public transport, and taking care of nature in their local area.

Think about one action you can take to improve your local environment.
